got the dlc but cannot use A-10 in game!. we cannot play the game, because of error 100000112 - neither a support nor a reaction - no solution from csis.

we really wanted to play this game. unfortunately i did a refund request for me and my presentee.. Level 5 is impossible.. Do I recommend this game? Well as you can see from my thumb, I definitely [do...why?](#)

Because it is fun in what it purposes, and it does it in many ways...like...do you want an enjoyable mindless eat them up game without any difficulty? You got that....you want something casual yet challenging? (replying to those who says this game IS NOT HARD IN ANY WAY AND THAT YOU CANNOT DIE) Just put the difficulty on "Deadly" and you will die in one bite...to start the level again.

I enjoyed this for what it actually IS...a casual and enjoyable eat em up game, and hey....u got achievements to take! So if you say this is not challenging try to take three stars in each level in "Deadly" difficult.

PS Seeing a goldfish eating a city is EPIC xD. I purchased this, after having played an old version, to support the dev and write a review.

Don't go into this thinking you're going to get a perfectly polished experience. This was made by a solo developer and originally for free, but due to the overwhelming positive feedback from the community and them pushing for it to have a paid release here we are. The game is fantastic for what its, a one hour neon-soaked romp through a beautifully detailed city. But it's not without some issues.

The animations aren't great, the story is campy and the gameplay consists of mostly walking and talking, following clues and some mild puzzles. No voice acting, so don't go in expecting that. For what it is, and it does a good job of explaining what it is, it's fantastic. And for that I think is worth your \$3, but if you go in expecting something more than what it says it is, you will be disappointed.

Fubenalvo, congrats on the Steam release! It's awesome to see you here :). I have a fair few items in my library. Some I have played, a lot not even installed. So from now on I will install, and play each item for at least an hour.

These will be my first impressions not full on reviews as an hour is not a great deal of time. So please keep this in mind. Also keep in mind these are MY impressions I do not expect you all to agree so don't shoot me.

For me 3DMark is a good little program for checking what your pc can do. That's it to be honest. Yes when it's checking your GPU the videos are great to watch, but once you watched once well you seen it.

The only reason I have over 3hrs on this, is that I left it running while I went out one day.

Do I recommend this hmm tough choice. If you tinker often with your GPU setting etc. than yes it's a nice looking program. If you're not and you just want to see what your GPU can do then no. You will use 2 or 3 times and then like me you're happy with your settings that's it.

So if you can get this at a heavy reduced cost, then get it. If not they are plenty not so pretty programs out there, that do the same job for free.

. Most of the reviews are correct. It crashes. Fortunately, it seems that I have found a solution to this problem. Just save the game at the beginning of the game, and save more later. It works for me. I do hope that it will work for you.

Never was a fan of tycoons before, but this is just the matter of a theme. Running your own virtual porn studio is really hard task - you need editing, rent rooms for shooting, looking for actors and analyze (lol, -> analyze <- ;)) the market so you can make more money. I recommend this game to refresh your look about these "smart" games that no one touch because they are "boring". That was fun experience to build my own porn-brand and ruining it because i decided to hire a lot of ugly actors and made the boring classical porn.. In early access, but seems pretty cool so far, it reminds you a bit of super smash brothers but with its own flair.

Fun style animations and combat. I would love to play it finished.. I don't know what everyone's going on about. Maybe they're in a bad mood or somethin'. Where I'm from, we give a game a gosh darn go at it before we criticize! It says "Early Access" for a reason, people!!! Which means, the darn game isn't done yet. So give it some time. Do you criticize the caterpillar for not taking flight??? Exactly.

But in all seriousness, please don't buy this at full price. As much as I love this game for a good goof or two, and as much as I respect the developer for gaving a good sense of humor and wish him the best, at its present state, this game is a dud guys. No offense, Lucas. Big proprs, respect ya. Just tellin' it like it is. I'm a simple man with simple tastes and large dreams.

Happy Easter everybody.. all i need to say is the game keeps crashing. Video of gameplay: <https://youtu.be/kQVZTLhPNSg>

This is a very well made game, I love the concept. You are in a carboard maze/labrynth attempting to find your way out while avoiding boobie traps and THE PUMPKING KING. You can reset traps to get rid of the pumpkin king or shoot him with various weapons you aquire. The maps are procedurally generated and there is even an option in the settings to open a map "seed". You input numbers and it generates a map, so you can replicate the exact same map by inputting certain numbers. This is definitely cool if someone finds a unique map or a hard map you can give friends the seed # for the map. I like that they have both teleport and full locomotion options for this game for those prone to motion sickness, you won't have any issues.

The games not real scary but it gets intense and creepy when the pumpking king is chasing you. The various roaches zooming around startled me a few times lol.

Great game, DEFINITELY worth the price, especially at the launch sale pricepoint!. its a really good game and i love playing it :)

. A nice little indie Shoot'em Up with a few twists.. ****DO NOT BUY AT FULL PRICE****

I would only buy this if it is on sale or if you just want the locos. This pack is very buggy and is very unpolished. Because this was released back in 2012, it has a lot of the problems that plagued many of RSC's (The previous developer) problems which I will present in a Pro/Con format.

Pro:

-You get a lot of locomotives

Cons:

-Stretchy couples

-No numberboard lights

-Windows and doors inoperable

-No ND units (This is were you have the option to put the same loco when you put a consist together but with out a driver in the cab)

-No interior lighting (DO NOT USE ANY OF THESE LOCOS AT NIGHT YOU WONT SEE ANYTHING!)

-No step lights

-Incorrect engines sounds, bells and horns. Both the EMD SD70MAC & EMD SD70ACE included in this pack share the same engine sounds, bell, and horn of the EMD SD75M and Union pacific SD60M.

-Dynamic Brakes do not work properly

-No water effects on windshield, no need for wipers basically.

-No Dynamic Headlight effect (Basically this effect is where you can see the train engine's headlight from far away. For example the headlights found on the, F59PHI, F59PH, SD60M, Amtrak Dash 8-Bwh, P42DC... etc.

Overall: Do not buy at full price. The pack lacks a lot of the advanced details that some of the other DLCs have. The locos are very buggy and don't run too well. (They are runnable but avoid nighttime because you won't see very well.) Since Dovetail games owns Train Sim, I doubt this pack or any other DLC that was release by RSC will ever get fixed.

Score 2.5/10 NEEDS TO BE UPDATED
